

PERSONAL STATEMENT

My name is Christos Chiotis. I have worked as a graphics designer since 2004 and as a web designer since 2005. Until today, I launched and managed over a hundred of websites.

With 12 years in business, working with agencies or as a freelancer, I have the skills to understand quickly client needs and deliver fast results, with the maximum quality.

I helped small to medium sized business improve their online presence. With my help they created new products and online services.

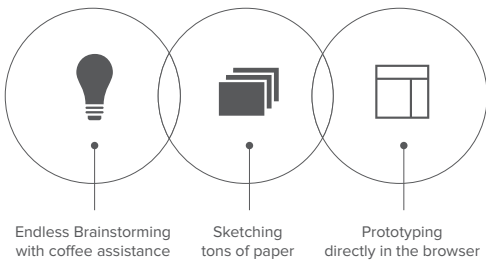

I aim to create clean designs, with a short learning curve of your product. As a supporter of minimalism, my designs are subtle. They are playing the supporting role on your project. Your idea is playing the starring role.

Partner & Designer at @sentel_co. Part of the Corne.gr team. Freelancer. Wordpress Fanatic. Father of two princesses.

On 2015 I launched my personal agency. We are specializing in website solutions and user interface design.

“Finished is often better than perfect”

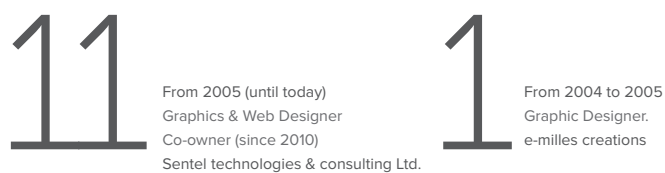

MY WAY
